Experience

Staff Technical Product Manager January 2021 - Current Jet Constellations

Milwaukee, WI • Facilitated meetings with clients and the development team for weekly sprints and milestones.

- Conducted thorough reviews and testing of applications.
- Created and delivered detailed reports for the internal team, communicating strategic goals, and identifying potential roadblocks.

Software Developer - Contract February 2022 - October 2022 NewWorldNow Hales Corners, WI • Designed compelling features as a full-stack developer with expertise in Angular 10 creating dashboards and tables filtering data related to the user.

- Carefully configured and testing of microservices, using REST.
- Utilized MySQL for feature flags and created tables needed regularly.
- Set up automated email sender SendGrid for different actions like new users signing up.

Full Stack Engineer November 2021 – February 2022 TeachSafe Pewaukee, WI • Ensured responsiveness on web and mobile devices using React.

- Processed and created signature pages at the end of a driving school course application with React and C#.
- Developed and reconstructed unit tests for new and old development.

Engineering/Python Intern January 2018 - October 2018 Wolf Star Technologies Milwaukee, WI
